PROFILE

My name is Simas. I'm on track to finish my data analysis courses. I used to work in various jobs: assistant store manager, gaming machine service technician, and production operator. I have developed skills such as attention to detail, the ability to make decisions, communicate, and share information, leadership and organisational abilities, and problem-solving skills. I've become passionate about using data to discover meaningful insights, and I am ready to put my technical and analytical skills to use in the field of data science.

EMPLOYMENT HISTORY

Assistant store manager, "Rimi Baltic"

Palanga

Apr 2014 — Jan 2015

Key Responsibilities:

- Helping to ensure the efficient operation of the store
- Responding to customer queries and complaints whilst ensuring high levels of customer service
- Using your initiative to ensure the store runs smoothly and all our customers leave feeling happy and satisfied with the service provided.
- Managing the store in the manager's absence
- Working closely with the Store Manager to drive sales and increase profitability.
- Assisting with training new partners (employees) and welcoming them into the team.

Gaming machine service technician, "Zaislu planeta", UAB

Palanga

Oct 2015 — Jan 2017

As a Gaming Machine Service Technician I played role in assisting our customers by providing a full range of technical support on gaming machines. Some of the regular activities performed include:

- Complete preventative maintenance and reactive repairs on the full range of Gaming equipment
- Installation and removal of gaming product

- Ensuring electronic job system and paperwork is completed real time / on time and with 100% accuracy.
- Provide technical and product information to customers to increase their knowledge.
- Provide a high level of customer service and exceed customer expectations
- Ensuring all activities meet compliance and regulatory requirements.

Production Operative, "Scandia Steel Baltic"

Kretinga

Mar 2017 — Feb 2018

Key responsibilities and duties:

- Work with CNC lathes and their maintenance
- Working to Engineer drawings & precise tolerances
- Product quality assurance
- Programming, setting, and operating CNC lathes.
- Ability to resolve queries and problems to best of knowledge before escalating up to next level. Ensure minimum occurrence of errors and provide workable solutions
- Choosing the correct tooling and manufacturing methods for each job
- Minimise setup and run times whilst maintaining a high
